Village Nurseries

# DESCRIPTIVE PRICE-LIST OF NURSERY STOCK SPRING 1941

## FRUIT AND ORNAMENTAL TREES AND PLANTS

JOS. H. BLACK, SON & CO. HIGHTSTOWN, N. J.

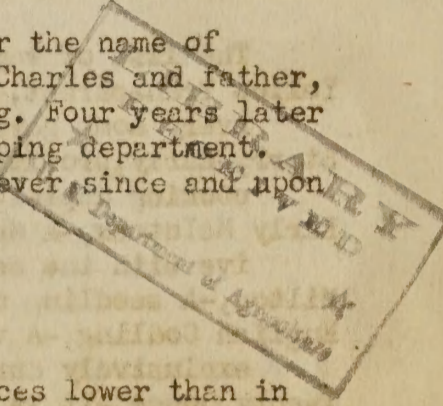

WALTER C. BLACK, OWNER AND MANAGER

PHONE 436

These nurseries were started by my family 72 years ago under the name of Village Nurseries. Eight years later, I began work for my Uncle Charles and father, Joseph H. After two years was made foreman of the propagating gang. Four years later due to the illness of Uncle Charles I managed the sales and shipping department. In 1888 I bought out my Uncle's interest and have been manager ever since and upon father's death I became sole owner.

I solicit your continued patronage.

WALTER C. BLACK.

Below is the Index of the Contents and Prices.

- Page 2. APPLE TREES, Budded on French Crab. I am making the prices lower than in many years. Many hundreds of acres of orchards are being taken out and I am sure that new orchards will be profitable.
- " 3. CRAB APPLE TREES, they have been profitable every year.
- " 3. PEACH TREES, with the best possible roots, 16 varieties.
- " 4. CURRENT BUSHES, Red Lake, a new variety and President Wilder.
- " 4. SWEET CHERRY TREES on Mazzard stocks and the higher cost of growing them is well worth while to the planter.
- " SOUR CHERRIES, Montmorency and Richmond are the best late and early varieties respectively.
- " PEAR TREES, seven best varieties for this section of the U.S.A.
- " PLUM TREES, seven varieties on Plum stock. You can get them cheaper on other stock but they are no good at any price.
- " GRAPE VINES, Concord and Niagara for market and five other varieties to give variety and lengthen the season for home use.
- " 5. ROSE BUSHES, 17 varieties of Everblooming Hybrid Teas. Pauls Scarlet and Dr. Van Fleet in climbers. Strong 2 year Dormant Field Grown.
- " PYRACANTHA LALANDI, An evergreen bearing orange berries.
- " PINK DOGWOOD, also nursery grown White Dogwood.
- " FLOWERING CRAB, 3 very fine varieties.
- " JAPAN FLOWERING CHERRY, Kwansen the best double pink variety.
- " JAPANESE FLOWERING QUINCE, grafted stock, will give fine red bloom.
- " PAULS SCARLET HAWTHORNE, without thorns and with beautiful scarlet flowers.
- " 6. QUINCE TREES, on quince roots.
- " GOOSEBERRY BUSHES, Yellow Downing and Red Jacket.
- " STRAWBERRY PLANTS, 6 varieties certified free from Red Stele.
- " RASPBERRY BUSHES, Latham, Taylor and Marcy in Red and Cumberland Blackcap.
- " BLACKBERRY BUSHES, 2 good varieties.
- " 7. NORWAY MAPLES, the best of all shade trees.
- " PIN OAK Plane and Linden and Schwealers shade trees.
- " JAPAN MAPLE, Cut-leaf White Birch and European Ash in Ornamental Trees.
- " WEeping FLOWERING CHERRIES, Single and Double.
- " FLOWERING SHRUBS, there are 19 varieties listed and we have some others.
- " MAGNOLIAS, Pink, white and purple varieties.
- " HELDGING, Barberry, Privet and Spirea.
- " VINES AND GROUND COVERS, including wisteria and Honeysuckle.
- " 8. BLUEBERRIES, 5 of the best Whitesbog varieties for size and quality at such low prices that everyone can afford to plant some.
- " RHODODENDRONS, Hybrids and Natives.
- " YEWS, 5 varieties, the best. They are of different habit suited for several uses, nothing is better.
- " AZALEAS, the standard varieties and the best new hybrids. All hardy.
- " BUTTERFLY BUSHES, four of the newer and dwarfier varieties with wonderful coloring.

### ASPARAGUS ROOTS

We grow only one variety of asparagus. It is Washington and no one can have a better and more rust resistant type as our seed is from selected plants of the best strain.

By Parcel Post 2 year extra heavy roots, 50 for \$1.00.  
By Express 80¢ per 100, \$6.00 per 1000, 5000 for \$7.50, 10,000 for \$50.00.

### EVERGREENS

We have a very large selection of evergreens including Spruces, Hemlocks, Arborvitae and Firs.

## APPLE TREES

Our trees are grown on French Crab seedlings from buds cut from bearing trees.

	1 to 9	10 to 49	50 to 100	300 or more.
	Each	Each	Each	Each
2 & 3 year 5ft. & up	40¢	25¢	20¢	17¢
" 4 to 6ft.	30¢	20¢	17¢	14¢
" 3 to 4ft.	25¢	15¢	13¢	12¢
"				

BY PARCEL POST-The 3 to 4ft. trees in two year can be sent by Parcel Post for 5¢ extra and when three or more are ordered add 2¢ per tree after the first two trees.

The list of varieties is arranged in the order of ripening.

Yellow Transparent,-A very early yellow apple that must be thinned to get size.

Every home garden should have one, too small for market.

Starr,-Early, profitable as a market apple, is large to very large, a splendid cooking apple. Is a good keeper and shipper, color greenish yellow.

Early McIntosh,-A McIntosh that ripens in July, splendid quality and very attractive with the decided McIntosh flavor.

Milton,-A seedling of McIntosh, highest quality and coloring, medium to large.

English Codling,-A very large green apple that the pie-makers are using almost exclusively during the two weeks of its season.

Twenty Ounce,-It is sold as a pie-apple just as soon as it reaches a good size as its quality for cooking is better than later when it becomes a red apple and less juicy, very large greenish yellow when it is marketed.

Wealthy,-Almost entirely covered with red, skin very smooth, flesh white, large, fine quality for any purpose. Tree upright and is an early and heavy bearer on all soils but gives the finest coloring on lighter soils.

Grimes Golden,-A golden yellow apple, highest quality for dessert and cooking.

McIntosh,-This great favorite in the market is a fall apple. Its color is purplish red overlaying the yellow-green ground. Quality the very highest, size medium to quite large.

Orleans,-A Delicious type that is sub-acid and high quality and large size.

Cortland,-A McIntosh seedling that is more attractive in color, larger and less liable to spray injury. We like it.

Reddest Delicious,-The original Delicious has been dropped because this is so much better. Solid red all over, conical, a very popular dessert apple. Flavor, quality and coloring superior to Delicious of which it is a sport.

Macoun,-A true McIntosh type of deep red coloring ripening later. They are as large as McIntosh and on heavy clay loam had splendid coloring and showed no russetting, better keeper than McIntosh.

Baldwin,-This apple in Jersey will bear a fine crop of very large apples red all over and of good quality. In central and south Jersey it is a fall apple.

Yellow Delicious,-A high quality apple that bears well every year and commands a good price in the market. It is superior in quality to Delicious and does well everywhere. The better it becomes known the better it will sell.

Rome Beauty,-As an early winter apple for New Jersey this has proven to be most profitable. Its fine color and size always attracts the buyer. Color is bright red over a beautiful yellow ground, large to very large; quality good both for cooking and eating. Colors best on light ground.

Red Rome (Coxes),-Red all over, large, good keeper, tree identical to Rome Beauty. Quality equal to and by some considered superior to Rome Beauty. Coxes Red Rome is, we think, a better market variety than Rome Beauty for the orchard planted on heavy soil.

Staymans (Staymans Winesap),-It is unquestionably the very best of all winter apples for market, home use and quality. We have always found it to be by far the most desirable of all others. It bears every year and will always sell.

Black's Staymans,-It has proven to be superior in all-over coloring on heavy soil. The quality is as good and it bears as well and is better in color.

Turley,-A seedling of Staymans that is very red all-over. It is large to very large and does not crack, of high quality and does not scald in cold storage. We believe that when it is better known it will be popular for storage.

Paragon,-It is more solid than Staymans, a brighter red color and keeps very late in the ordinary cellar, a heavy annual cropper, large size and uniform.

Additional Varieties,-We can do a few trees of 2 year old Rhode Island Greening, North Western Greening, Fall Pippin, and Gravenstein.

## CRAB APPLES

Hyslop,-A very dark reddish-purple crab of highest quality and coloring. The best of the crabs for jelly and market, a very heavy bearer.

2 year @ 75¢ each. 1 year @ 70¢ each.

Hopa,-Classed as a flowering crab which it really is but bears some small fruit, foliage, flowers and fruit of a bright beautiful color.

2 year \$1.00 each.

P E A C H T R E E S

	1 to 9	10 to 49	50 to 100
	Each	Each	Each
4 to 6ft.	30¢	25¢	22¢
3½ to 5ft.	25¢	20¢	18¢
3 to 4ft.	22¢	18¢	15¢
2 to 3ft.	20¢	16¢	13¢

By Parcels Post.—The three smaller grades by cutting back the tops. We can send C.O.D. for postage costs but you can save by including 5¢ for the first 2 trees and 2¢ per tree for additional trees.

Description of the best varieties.

The list is arranged in order of ripening rather than giving the date of ripening which varies with each geographical locality and with every season.

- Kathryn.—It is a perfect freestone, ripening with last of Carman. The color is clear cream-tinted white overspread with a beautiful very deep pink. Red fleshed.
- Golden Jubilee.—Without question the Golden Jubilee is the best peach of recent introduction. It is similar to Elberta in habit and form of tree and appearance of fruit. It is essentially a very early Elberta. A fine early yellow freestone, ripening at a time that assures for it a good market.
- Triogem—(N.J. #70).—Early, oval, red all over, firm, yellow fleshed freestone, ripening 2 days later than Jubilee. It colors well on all parts of the tree and hangs on well after ripening. It is a good shipper of high color.
- Sunhigh—(N.J. #82).—Large, bright red all over, smooth and firm. Ripens a few days before Golden East. The flesh is yellow and it appeals to the buyer and brings top prices in its season.
- Eclipse.—A yellow fleshed peach of fine texture and quality ripening with Hiley. Fruit oval and highly colored, hangs to the tree well and is a good shipper.
- Hiley.—(Early Belle)—Skin nearly covered with red, medium size but very uniform, freestone, oblong in shape, quality among the best, flesh red and rather dry.
- Golden East—(N.J. #87).—A large firm yellow fleshed freestone of fine coloring and good quality. Ripens with Hiley but is much larger and has more attractive coloring, the best market peach of its season.
- South Haven.—A highly recommended hardy yellow freestone ripening 10 to 12 days before Elberta and of better quality and coloring and equally as large.
- Hale Haven.—Ripening at the same season as South Haven said to have tougher skin making it a better shipper and keeper for more distant markets. A perfect freestone with yellow flesh and good coloring. Hardy, strong, upright grower.
- Summercrest—(N.J. #94).—A yellow fleshed freestone of large size and shaped like Elberta and a much more pleasing coloring. We consider it the very best peach of its season, highest quality of all seasons for eating and canning. Coming just before Elberta we would think that this was the best buy.
- Belle of Georgia.—It is a very large pink cheeked red fleshed peach of the highest quality, juicy and sweet and it bears young and the tree is the strongest grower of them all, ripens just before Elberta.
- Elberta.—Very large, skin golden yellow and where exposed to the sun is faintly striped with red, flesh yellow, very fine grain and firm texture, juicy, rich, sweet and very much in demand for canning. It will be hard to displace it in the minds of the housewife who knows what a fine canner it is and coming at just the right season when vacation time is over. It is a perfect freestone and will always be a good market variety. It does well everywhere.
- Hale—(J.H.Hale).—It ripens with or just after Elberta. It is yellow fleshed and has yellow skin with a fine red cheek. It is of high quality and is one of our best long distance shippers. Tree rather dwarf in habit, heavy cropper, fruit is the largest of all yellow fleshed peaches.
- Brackett.—Ripens after Elberta is finished, extending the yellow peach season. It is a deep yellow well shaded with carmine, entirely free and because of its splendid quality and season it is a good market peach of large size and its yellow flesh is juicy, good quality and splendid for canning.
- Adams Late.—It is the best peach in all ways that ripens after Elberta. It is a sport of Brackett and has all of its good qualities and ripens from ten days to two weeks later. A freestone that hangs to the tree well and sells well. Only a few Adams left. 2 to 3ft. @ 30¢ each.
- Iron Mountain.—Pure white flesh, skin yellowish white with a slight blush on the sunny side sometimes, large to very large, egg-shaped, free, sweet.

C U R R A N T S

- The fruit of the currant is much prized by the housewife for jellies and it takes but little space in the home garden. As a market crop it is profitable.
- Red Lake.—A new variety that has been found superior in size of bunch and berries to many of the older kinds and you should try some of them.  
30¢ each by Parcel Post. By Express 25¢ each, \$2.00 per 10.
- Wilder.—The best of all the older tested varieties, bunch is large and has a long picking stem with large berries. Plants are sturdy, healthy, heavy bearers.  
25¢ each by Parcel Post. By Express 20¢ each, \$1.50 per 10, \$12.00 per 100.

## SWEET CHERRY TREES ON MAZZARD STOCK

Many disappointments in growing sweet cherries was because they were on Mahaleb stock which is the kind generally used. N.Y. Experimental Station issued an illustrated bulletin showing very definitely the superiority of the Mazzard stock.

Prices.—2 year #1., 80¢ each; \$7.50 per 10.

- Black Tartarian.—Large to very large, sweet, juicy and high quality for dessert or canning. Glossy black and slightly earlier than some others.
- Gov. Wood.—Large to very large, yellowish white shaded with crimson, very popular variety for the home garden.
- Napoleon.—The largest variety on our list. It is a bright red over a yellowish background, firm texture.
- Schmidts (Bigarreau).—Large to very large, purplish black with dark red juice, sweet and high quality.
- Yellow Spanish.—An old variety, sometimes called Amber Heart. Large, yellow with a slight blush.

## SOUR CHERRY TREES

These are the heavy cropping, early bearing pie cherries. They bear the third year after planting.

Prices.—2 year #1., 75¢ each; \$7.00 per 10.

- Early Richmond.—An early sour pie cherry, medium size, light red, freestone.
- Large Montmorency.—A midseason tart cherry, dark red, freestone, large and highest quality, long stems, when fully ripe is not so sour but very rich.

## PEAR TREES

We list those varieties that have done best in this section over a long period of years.

Prices.—2 year #1 75¢ each; \$7.00 per 10.

- Beurre de Anjou.—Midseason pear, good quality, larger and later than Bartlett, greenish russet.
- Bartlett.—The best known and most popular variety because of its size and quality than which none are better. Ripens second early.
- Beurre Bosc.—Of highest quality, russet yellow with long neck, quality among the best of all pears, juicy and sweet, late.
- Clapps Favorite.—An early yellow pear with bright red cheek, of good quality.
- Keiffer.—The most prolific and hardiest of all pears in N.J. When properly picked and ripened is splendid canned, large and very juicy.
- Seckle.—Small, medium late, very sweet, russet variety and highest quality.
- Sheldon.—A juicy, high quality, heavily russeted variety. Large, medium late.

## PLUM TREES

Our trees are on the hardiest, all on plum stock.

Prices.—Strong 2 year #1., 75¢ each, \$7.00 per 10.

- Bradshaw.—A large early, dark purplish red variety of good quality, freestone, juicy.
- Green Gage.—Medium size, greenish yellow variety, sweet and fine quality.
- Reine Claude.—Medium size, greenish yellow freestone of the highest quality. We consider this the best of all European plums, early bearer and productive.
- Lombard.—Medium size, oval, violet red, juicy, high quality, a good market variety.
- Fellemburg Prune.—A large freestone prune of highest quality, early bearer. Blue German Prune.—The best known and most popular of all prunes, blue, large freestone.
- Abundance.—The best Japan plum, red, juicy, sweet, early bearer.

## GRAPES

Our list of grapes is made up of those varieties which are best suited for the home garden for home use. It includes both Concord and Niagara which are the only varieties we would recommend for commercial planting.

Prices.—Concord 2 year #1., 20¢ each; \$1.50 per 10; \$8.00 per 100.

Other varieties 2 year #1., 25¢ each; \$2.00 per 10.

- Brighton.—Early, large clusters of large wine red berries, sweet and highest quality.
- Campbells Early.—A large black variety that ripens early. It has a slight fox-grape aroma and taste which is very pleasing to some.
- Caco.—A large grape of pale red coloring, bunches loose, highest quality.
- Concord.—The best of our grapes because it bears well, is hardy, of high quality, has large clusters of large purplish black fruit in great quantities.
- Delaware.—A small red grape in compact clusters. The sweetest of all grapes.
- Niagara.—The best white grape in this section, extra large, compact bunches, slightly aromatic and sweet. Should be in every home garden.
- Worden.—A very large black grape ripening before Concord which is unsurpassed for quality. In fact, it is the best quality of all black grapes and much the sweetest. Everyone who eats it calls for more.

R O S E S

HYBRID TEAS, EVERBLOOMING, Dormant Strong #1 Plants.

By Express or at the Nursery 25¢ each, 4 for 90¢. 10 for \$2.10  
 By Parcels Post Prepaid at 5¢ per plant extra.

- AUTUMN.-An exceptionally strong upright grower, flowers have long strong stems and are very double, color is rich burnt-orange, yellow and red.
- BETTY UPRICHARD.-A profuse bloomer of extremely lasting qualities of brilliant orange-carmine on outer surface of petals, soft pink inside.
- CALEDONIA.-One of the very best white varieties having long well formed buds, large double, and lasting blooms.
- CONDESA SASTAGG.-Bears profusely full double two-toned blossoms on vigorous bushy plants, petals are coppery-pink inside and golden-yellow on reverse.
- EDEL.-A very strong plant which bears a profusion of exceptionally fragrant flowers that are ivory-white.
- ETOILLE DE HOLLANDE.-An extremely hardy long lived plant that blooms all summer, the flowers are dark velvety-red, large and fragrant.
- FRAU KARL DRUSCHKI.-A strong sturdy well branched plant with pure white blooms,
- FRANCIS SCOTT KEY.-A strong growing plant that bears immense flowers that are very double and a rich crimson coloring.
- GOLDEN DAWN.-Another very vigorous and strong growing plant with blossoms of a sun-yellow that are very double and fragrant.
- GOLDEN RAPTURE.-Long lasting beautifully formed buds which open fully double, and are a rich yellow with long stems. A vigorous grower.
- MARGARET MC GREY.-A very bushy plant that is extremely vigorous bearing great numbers of full orange-scarlet blooms.
- MISS ROWENA THOM.-Good growing plants bearing profusely, immense bright pink flowers with golden base.
- MRS. E. P. THOM.-Has pure yellow very double bloom in great numbers on strong bushy plants.
- PRESIDENT HERBERT HOOVER.-Long stemmed bloom on vigorous plants, extremely double and large, color is of creamy-yellow tinted with flame pink. Beautiful.
- RADIANCE PINK.-This continues to be the most popular for it is one of the hardiest and most vigorous growers. The blooms are rosy-opaline pink.
- RADIANCE RED.-Has all the good qualities of the pink variety of which it is a sport. The color is a glowing crimson.
- TALISMAN.-A well known favorite that has done exceptionally well for us over many seasons. Two tones of rich yellow and rosy-red, most pleasing.

Climbing Varieties

- DR. W. VANFLEET.-An exceptionally hardy and fast grower that bears great masses of large flesh colored flowers that are quite pink, at first with a rosy center.
- PAULS SCARLET.-Very hardy and a strong grower, bearing bright scarlet flowers.

ORNAMENTALS

Special Items

- PYRACANTHA COCCINEA LALANDI-(Lelands Firethorn):-A rather tall growing evergreen shrub with beautiful shining green leaves. It bears large clusters of orange-red fruit that are so attractive as to demand immediate attention.  
 4" Potted Plants 75¢ each, 3 for \$2.00.  
 15 to 18 inch, field grown \$1.50 each; 18 to 24 inch \$2.00 each.
- ABELIA GRANDIFLORA.-Semi-evergreen, having shiny deep green leaves that bears a great profusion of very sweet scented flowers. Large clumps \$1.00 each.
- DOGWOOD, PINK FLOWERING.-A most desirable bushy tree with pink flowers early in spring. The foliage in early fall is the finest in color for a longer time than any other tree or shrub. 3 to 3½ ft. \$2.00, 4 ft. \$3.00, 5 ft. \$5.00, 12 to 18 inches 75¢.
- DOGWOOD, WHITE FLOWERING.-Too well known for its white bloom in the spring and beautiful foliage in the fall to need any further description.  
 Nursery Grown 4 ft. \$1.00 each, 5 ft. \$1.25 each.
- FLOWERING CRAB APPLES.-The three varieties listed below. 3 year olds \$1.50 each, 3 for \$3.75.  
 Bechtels.-Large, double pink flowers, dwarf habit.  
 Hops.-Red leaves and bloom with red fruit.  
 Rosea Plena.-Deep rose-pink, double flowers in great profusion.
- JAPAN FLOWERING CHERRY.-Kuansan the best double flowering, deep pink variety.  
 4 to 5 ft. \$2.00.
- JAPANESE FLOWERING QUINCE.- (Apple Japonica)-Flowers deep scarlet early in spring, leaves bright shiny green. Out stock is budded. 2 to 3 ft. \$1.00 each.
- PAULS SCARLET HAWTHORNE.-Bears double scarlet flowers in great profusion and is the most attractive of the class and unlike the others has no thorns.  
 5 ft. @ \$1.50 each, 2 ft. @ 60¢.

## QUINCE TREES

Prices.-2 year, extra heavy 75¢ each; 3 for \$2.00.  
 Orange.-Without question this is the best variety for this section, while not as large as some others, its quality and texture are decidedly superior.

## GOOSEBERRIES

Gooseberries as you know make excellent pies and the housewife can always find use for them. Better put a few plants in the garden.

Prices.-2 year #1., 30¢ each; \$2.50 per 10 by Parcel Post.

2 year #1., 25¢ " ; \$2.00 " " by Express.

Downing.-Medium to large flesh, soft, juicy, tender, quality good, color greenish yellow turning to pinkish yellow as they ripen.

Red Jacket (Josselyn).-A large red variety quite some larger than other American varieties, juicy and only moderately sour. Sweet when fully ripened on plant.

## STRAWBERRIES

Red Stele rot of the root of the south is very destructive to the Strawberry growers of any section. Those areas where it has been found have suffered terrific losses.

Your only safety lies in buying plants that have been carefully inspected and are certified by our State Inspectors.

Our plants are grown on ground never before used for Strawberries from plants pronounced free from Red Stele. They will also be accompanied by certificates of freedom of the disease.

Prices.-By Parcel Post 25 for 30¢; \$1.00 per 100.

By Express, -75¢ per 100; \$6.00 per 1000.

Pathfinder.-A new variety sent out by the N.J. Experimental Station. It is a large attractive, bright red-all-over variety that sells at a premium over other varieties of the same season. It is a moderate plant maker of exceptionally strong crowns of great productiveness. It is very resistant to Red Stele. Midseason variety of great worth.

Fairfax.-A large deep red variety of unsurpassed sweetness and quality. Uniform in shape, large to very large in size. The plants have strong crowns and although not as heavy a plant maker as some, every plant is a strong one. It is the largest and best of all early varieties, ripens a few days after Premier.

Dorsett.-A prolific plant maker that bears heavy crops of medium to large berries of lighter coloring than Fairfax and ripens a trifle earlier, good shipper.

Premier.-The earliest of all varieties, is firm and medium to large size. The color is splendid and the shape is narrow-conical.

Joe (Joe Black or Big Joe).-This variety was originated and introduced by us many years ago but has never been superceded by any midseason berry. The plant is large and the foliage is perfect. The berries are very large of bright red color with yellow seeds that stand out to protect the pulp, firm and sweet. On light sandy soils of moderate fertility it attains its best color and quality. Too much foliage caused by too rich soil or fertilizer is to be avoided.

Catskill.-A newer midseason variety that is slightly later than Joe and needs rich soil to give it size, moderate plant maker, fruit is rich red and texture is very firm, making it a good shipper.

## RASPBERRIES

Our stock is nursery grown, certified as to purity and freedom from disease. We do not handle sucker plants taken from fruiting patches and strongly advise against their use, they are cheaper but dear at any price.

Prices.-By Parcel Post 60¢ per 10. By Express 50¢ per 10; \$3.50 per 100.

Latham.-We have found this to be reliable, well tested variety of large size, good red color and firm. It is hardy and a strong grower that does not need support under proper feeding and pruning methods. We consider it the most profitable midseason for the market gardener.

Prices.-\$30.00 per 1000.

Taylor.-A new red variety bearing immense thimble berries, it is a strong grower bearing large crops of beautiful firm and high quality fruit.

Marcy.-A new red variety of exceptionally strong growth. Berries very large of conical form, firm, medium red, and excellent quality. The sturdy canes need no support, they are inclined to be branched. Good cropper.

Cumberland.-A blackcap of large size that is a good bearer and without question is the best black raspberry for home and market.

## BLACKBERRIES

Prices.-By Parcel Post 60¢ per 10. By Express 50¢ per 10; \$3.50 per 100.

Best of All.-A large sweet berry that bears good crops every year.

Alfred.-A new variety that ripens just after the above, large, sweet, hardy, productive

## BLUEBERRIES

See new low prices at the top of page 8.

## ORNAMENTAL AND SHADE TREES

Norway Maples.-This is, by far, the best of all shade trees for the central states.

It is hardier and more free of insect pests than any other shade tree.

Prices.-12 to 14ft., 3½in. caliper \$6.00; 3in. caliper \$5.00.

10 to 12ft., 2 in. to 2½ in. \$3.00 each; 2 for \$5.50; \$25.00 per 10.

10 to 11ft., 1½in. to 2 in. \$2.50 each; 2 for \$4.50; \$20.00 per 10.

8 to 10ft., branched \$1.50 each; 2 for \$2.75; \$12.50 per 10.

Pin Oak.-Very hardy, more popular every year. 10ft. \$3.50.

European Mountain Ash.-Upright, bears large clusters of orange berries. 8/10ft. \$2.00.

Cut-leaf Weeping Birch.-Upright, closely branched tree with beautiful ivory-white bark when mature, branches are rather pendulous and the leaves beautifully cut and feathery. 6 to 7ft., well branched \$2.00.

White Birch.-European-Hardier and whiter than the native variety. 5ft. \$1.25.

Oriental Plane.-The well know Buttonwood. 8 to 10ft. \$3.00.

Linden European.-A beautiful tree with many branches, small leaves. 8 to 10ft. \$3.50.

Japan Maple.-Purple-leaf dwarf, Well branched. 3ft. \$2.50.

" " .-Cut-leaf Weeping, red leaf 18 inch \$3.50.

Schwedlers Maple.-A form of Norway Maple with red leaves. 7 to 8ft. \$2.00 each.

## WEeping FLOWERING CHERRIES

The beauty of this tree when in bloom in early spring is so pronounced that everyone wants one and the weeping habit and bright green leaves makes it a beautiful lawn tree.

SINGLE PINK.-Completely covered with light pink bloom before the leaves develop, branches droop to the ground. 5 to 6ft. stems, #1 heads \$3.00 each.

DOUBLE PINK.-Slightly later than the above with deeper pink bloom that hangs on well. 5 to 6ft. stems, \$3.00 each.

## FLOWERING SHRUBS

Almond.-Double flowering pink or white on Plum stock. 3ft. \$1.00.

Bittersweet.-A climber noted for its beautiful berries in late fall. 3ft. 50¢.

Deutzia Gracilis.-A dwarf, profuse white flowering shrub. 15in. 35¢.

" Lemoine.-A half dwarf shrub bearing masses of double white blooms. 15in. 35¢.

" Scabra Plena.-Upright bush bearing double pink flowers. 3ft. 35¢.

Forsythia Fortunei.-Semi-weeping, great bloomer, bright yellow. 3ft. 35¢.

" Spectabilis.-Upright, deepest yellow Forsythia, hardy. 3ft. 35¢.

Hydrangea Paniculata Grandiflora.-Immense panicles of white flowers. 3ft. 25¢.

Bush Honeysuckle, Fragrantissima.-Semi-evergreen, early, very sweet bloom, 2ft. 25¢.

" " , Pink Tartarica.-Late pink bloom and berries. 2ft. 25¢.

" " , Morrowi.-Pure white, profuse bloomer 2ft. 25¢.

Philadelphus Mock Orange.-Inodorous and Coronarius. 2 to 3ft. 15¢.

" Virginalis.-Double, constant bloomer, very sweet. 2 to 3ft. 40¢.

Quince Japanese Flowering-(Apple Japonica)(Flowering Quince).-A profuse bloomer bearing bright red flowers. Has deep green foliage. Budded stock of best coloring. 3ft. \$1.25.

Spiraea Anthony Waterer.-Pink, everbloomer, dwarf. 18in. 30¢; 24in. 40¢.

" Van Houttei.-Great drooping fronds of white flowers. 18 to 24in. 20¢.

Viburnum Burkwoodi.-An improved type of Carlesii that has clusters of wax-like pink flowers. The bloom is beautiful and is sweeter than Arbutus. The foliage is leathery and glossy, deep green. The most attractive recent introduction in floriculture. 18 inch, transplanted \$1.25.

Viburnum Plicatum (Japan Snowball).-Bears large balls of white flowers. 2 to 3ft. 50¢.

Weigelia Rosea.-Great masses of pink bloom. 4ft. 35¢.

## MAGNOLIAS

## WHITESBOG BLUEBERRIES

The large improved Huckleberries, fruit is large with small seeds and very sweet. They should have slightly acid soil although we had a fine crop from bushes that had been set only 2 years on high ground not specially prepared and in spite of a very dry time while they were maturing. This dry spell did reduce the size but not the quality.

Prices.—In past years the high prices of the bushes was discouraging to the planter but our present prices make it possible for you to plant at a low initial cost.

	Each	Per 2	Per 6	Per 10	Per 100
6 to 12 inch	60¢	\$1.00	\$2.50	\$4.50	\$40.00
12 to 18 inch	75¢	1.25	3.50	6.75	50.00
18 to 24 inch	1.00	1.80	5.20	10.00	80.00
2 to 2½ft.	1.25	2.25	6.25	12.00	100.00

Jersey.—The largest of the tested varieties, produces good crops the second year.

Berries are exceptionally good quality, sometimes ¾ inch in circumference.

Rancocas.—A popular variety of large size and good cropper. The bush is rather dwarf and spreading with beautifully colored branches and foliage.

Concord.—A tall, strong grower with bright red twigs bearing great quantities of large sweet berries making it not only valuable but also most decorative.

Ruble.—A vigorous grower, 6ft., the berries are large and the coloring of the foliage is beautiful. The young wood is rich red in the winter.

Cabot.—About the earliest to ripen which makes it profitable for the grower who markets his berries. The berries are large and it is a heavy cropper.

## RHODODENDRONS

Rhododendron Hybrids, grafted varieties.

ALBUM NOVUM.—White, hardy, upright grower, 18 inch \$3.50.
